

# Using the ES Sustainability Tool – Mod 1 Northumberland 6th Oct 2009

## Delegate feedback

### What worked well?

- The triad exercise was good. Made us talk about the issues, and get a feel for using the tool
- Seeing how the tool had progressed and developed in response to our feedback on the pilot
- We've got clarity on what to do, developed strategies
- The expertise of the partnership co-ordinators (PCs)
- Facilitation skills
- Seeing that there is hard work, finance and support for PCs ie others are behind you
- It's a useful tool to aid conversations around the changing role of the head, and to promote wider conversations

### Even better if... ?

- ...the font on some of the handouts were more readable

*(This refers to an earlier version of the tool, and has now been rectified JM)*
